

ORTHENE®

PCO Pellets

Premium quality, broad-spectrum control.

The broad-spectrum
killing power of
Orthene PCO Pellets
means profitable pest
control operations
for you.

PRODUCT DESCRIPTION

Orthene PCO Pellets are proven to be highly effective against the most notorious pests. Best of all, pests such as the German cockroach and other challenging cockroach varieties have shown no resistance to Orthene PCO Pellets. The product is nonrepellent and nonflushing, so pests get a lethal dose of Orthene right away, preventing them from fleeing to other rooms to start new infestations. And, the nonrepellent properties of Orthene allow it to be used in conjunction with baits and baiting programs. No matter what kind of commercial accounts you handle—health care facilities, restaurants, warehouses, retail stores or others—you can depend on Orthene PCO Pellets to meet your customers' demands for high-quality service.

APPROVED USE

Orthene PCO is labeled for use within Industrial, Institutional, and Commercial Buildings including Food Areas, Non-Food Areas, and Serving Areas. May also be used as an outdoor treatment of ants and other pests.

APPLICATION

- Mix with water only
- Use indoors and outdoors
- Approved for food handling
- Crack and crevice
- Spot treatment
- Outdoor applications include perimeter and mound drench
- Not approved for residential areas indoors

FEATURES

- With double action, Orthene PCO Pellets provide relatively fast knockdown and long-lasting residual control for up to 12 weeks
- Stays on the surface, not absorbed by grease, ensuring insect contact
- Low toxicity—less than nicotine, caffeine and aspirin
- Can be mixed easily with water
- Apply cleanly and precisely
