DETAILED VIEW

ABOUT

The Bluecolt® T500 LED rechargeable flashlight can produce 500+ lumens at its highest setting. The precision machined reflector and heat-resistant glass lens creates a beam *nearly as bright as a car headlight*. Our unique design produces top-notch performance in a body that is only 6½ inches long and weighs only 8½ ounces. It is an extremely powerful tactical flashlight that is easy to carry and comes with all the accessories you need right out of the box. It is widely used and trusted by pest control professionals.

Bluecolt® flashlights have been tested in fire department burn simulations and have demonstrated great resilience. We carefully inspect each component for quality assurance in our stringent assembly process and test each flashlight prior to packaging. Every lens is air-cleaned to remove dust particles prior to packaging. Our manufacturing process insures a high quality product with unsurpassed reliability.
